- Received first prize for 'Sanskrti Ghyan' competition held by Vidhya Bharti in 2013-14.

## PROJECTS

### • Employee Churn Data Analysis

Employee Churn dataset analyzed to know the reason why employees are leaving the company and learn to predict who will leave the company. For better visualization, build model and evaluate using clustering with scikit package.

Skills: Python, Tableau

### • First Inning Score Predictor

The purpose of this project was to create an app where a user can predict the score of entire first inning by using some score of first few overs. This project is implemented using random forest algorithm.

Skills: Python, ML Algorithm, HTML, CSS

### • Scientific Calculator using JavaScript

This Project is developed with JavaScript to perform many mathematical tasks such as use of trigonometric functions or logarithms and addition or subtraction as well.

Skills: HTML, CSS, JavaScript

## CERTIFICATIONS

- Understanding with C++ [Udemy]
- Programming with C++ [Udacity]
- Crash Course on Python [Coursera]
- SQL for Data Science [Coursera]
- Data Scientist with Python [DataCamp]

## Personal Details

**Date of Birth:** 13 January 1998.

**Blood Group:** O +ve.

**Languages:** English, Hindi

## Declaration

The above information is true to the best of my knowledge and belief.

-Harish Bharti
